

Black problems are not racial, but cultural; and Democrats just watch as their inner-cities implode with lawless crime; drug addiction; and poverty. Since the 1960's, Black incarcerations have risen to **40%**. Abortions account for **38%** of babies murdered by Planned Parenthood (*650 per day; 5 times more than Whites*).

Government handouts have also enslaved Native Americans, forcing them to live in squalor and poverty on reservations. The Tribes that "Opted Out" are running successful businesses; live in beautiful housing and communities with some of the best Charter schools in the country that they built and operate.

Welfare never accomplishes what it is intended to do because it gives the recipient a "hand-out", and not a "hand-up" to be self-reliant. Ronald Reagan captured the failure of our Welfare System in the following narrative, the: "Welfare Queen"

"There's a woman in Chicago. She has 80 names, 30 addressees, 12 Social Security cards and is collecting veterans' benefits on four nonexistent deceased husbands. She's got Medicaid, is getting food stamps and welfare under each of her names. Her tax-free cash income alone is \$150,000."

Blacks need to have hope, not anger and hate. Our country must unite and stop the destructive division, that has no benefit and draws us further apart.
