Research by Ballotpedia for 2012–2013 school year, from: National Center for Education Statics (NCES), Common Core of Data, State Nonfiscal Public Elementary/Secondary Education Survey. Although dated, it is the only comprehensive study available. Data accessed May, 2015.

Recent studies show a *decline* in the number of **School Districts** to **13,194**, which is due to a reduction in enrollments; and, the consolidation of Districts.

The growth of **Alternative Education** has also reduced attendance at K-12 Public Schools, that will continue with the *enactment of **School Choice***.

The updated numbers of **Schools** (**98,469**); **Students** (**48,847,268**); and, **Teachers** (**3,192,309**) are consistent with Education Statistics presented.
