

It is estimated that 3,200 Commissioners with staffed Offices could run Schools nationwide. *(Based on 30 Schools and 15,000 Students per Commission.)*

The proposed system of using Standards for Policies is reviving Florida's dying Schools. Governor Ron DeSantis has stopped the intrusion and demise of Florida's Education System. An amazing accomplishment that now ranks Florida as **3rd for Achievement; 1st for Education Freedom;** and, **14th for Quality.** The downside is, reform is not permanent.

The roles of School Administrators are similar to Corporate Executives. The Principal is the **CEO** responsible for School Performance, Achievement, and Culture. The Assistant Principle *(there will only be one)* oversees School Operations as **COO**. The Controller acts as **CFO** for budgeting, procurement, and management of financial systems. A Director of Communications provides timely reports on School Performance, Policies, and Activities. HR handles employment services subject to policies and contract approval by the Board.
